# 17 Coastal Master Plan

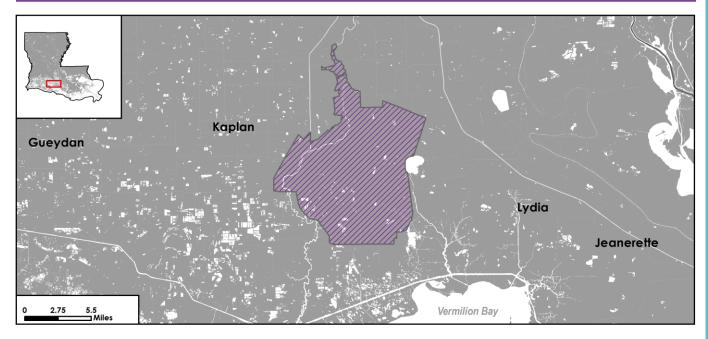

Implementation Period I

# Vermilion - Abbeville/Delcambre

### **Nonstructural Risk Reduction**

Project ID: VER.02N

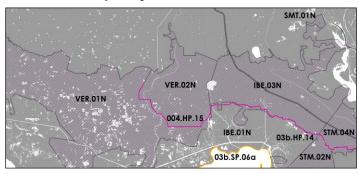

### **Description**

Project includes floodproofing non-residential properties where 100-year flood depths are 1-3 feet, elevating residential properties where 100-year flood depths are 3-14 feet, and acquiring residential properties where 100-year flood depths are greater than 14 feet.

<b>Project Cost Estimate</b>	Structures	
Voluntary Measure	Mitigated	Estimated Cost
Non-residential Floodproofing	113	\$92,300,000
Residential Elevation	635	\$92,000,000
Residential Acquisition	14	\$6,300,000
Total	762	\$190,600,000

# Other Nearby Projects in the Master Plan

### Scale of Influence

000.0	J		
<u></u>			
Local	Sub-basin	Basin	Regional

### **Project Location**

Vermillion Parish

### **Project Duration**

Construction is estimated to take 4 years.

### Note:

Cost Estimate does not represent specific residential or commercial structures to be mitigated.

Other Project Area Statistics		
Estimated Current Population		
U.S. Census (2010), U.S. Dept. of Energy Oak Ridge National Laboratory, Land Scan (2011)	34,281	
Percent of Population who are Low-to-Moderate Income	40%	
American Community Survey (2006-2010)		
Number of Severe Repetitive		
Loss Properties	193	
Governor's Office of Homeland Security (2015)

### **Nonstructural Risk Reduction**

Project ID: VER.02N

## **Economic Damage**

Nonstructural risk reduction projects are evaluated by how they reduce Expected Annual Damage (EAD) for a particular area. EAD represents the average direct economic damage projected to result from storm surge flooding events, from Category 1 or greater storms, in any given year, taking into account both the expected damage and the overall frequency of such storms occurring. EAD is a summary measure of the potential damage averaged over the entire distribution of possible flood events. Damage is also summarized at various return periods (DRP), e.g., 100-year damage being the damage with a 1% chance of occurring or being exceeded in a given year. The following are the economic damage summaries for the Future Without Action (FWOA) and Future With Project (FWP) conditions for EAD (Table 1) and by return period (Table 2). EAD and DRP values are reported in millions of dollars.

Table 1: Expected Annual Damage

Year	FWOA	FWP	Difference	
0	\$45 M	1	-	
10	\$79 M	\$55 M	\$24 M	
25	\$127 M	\$89 M	\$38 M	
50	\$284 M	\$238 M	\$46 M	

Table 2: Economic Damage by Return Period

Year	50 Y	ear	100 Y	'ear	500	Year
rear	FWOA	FWP	FWOA	FWP	FWOA	FWP
0	\$453 M	-	\$2,175 M	-	\$3,089 M	-
10	\$1,438 M	\$1,349 M	\$4,072 M	\$2,553 M	\$5,054 M	\$3,308 M
25	\$4,121 M	\$2,654 M	\$5,624 M	\$3,809 M	\$6,232 M	\$4,398 M
50	\$7,026 M	\$5,346 M	\$10,039 M	\$9,097 M	\$12,706 M	\$11,913 M
